

Instructions: Legibly complete each of the following on lined paper and submit on Gradescope.
--

This assignment walks you through the process of submitting work to Gradescope. You may submit this assignment as many times as necessary *before the due date* to get full marks. After this assignment, you will have only one chance to conform to my submission guidelines.

1. Obtain a scanner application. I suggest “Genius Scan”, which is free if you use your university email account. Just search for this on whatever repository your phone uses for applications (e.g. “Google Play” or “App Store”).
2. Get two separate pieces of paper.
 - (a) On the first page, write something about yourself (as short or as long as you like: maybe you have an interesting hobby, a favourite band, or a pet you want to tell me about). Label this “Question 1”.
 - (b) On the second page, make two “parts”. For the first part (“Question 2.1”), draw a picture of anything; it doesn’t need to be well-drawn, and can be as simple or as complicated as you want to make it. For the second part (“Question 2.2”), **on the same page** write a list of things you hope to learn from this class.
3. Scan your “work” into **a single** PDF using the scanner application you downloaded in part 1.
4. Login to Gradescope and click on the assignment “Homework 0”. Submit your PDF, linking the questions to the appropriate pages. Note that you can link the same question to multiple pages (in case your work goes over one page, for example).
5. Wait for me to grade it, and then review my comments after I return your work electronically.
